

INTELLIMETER CANADA INC.

Industry: Smart Meters
 NAICS: 334513
 SIC: 2823
 US Patent #8,049,488

ESTABLISHED: 1991
 EMPLOYEES: 32
 DUNS: 202678012

ENERGY METER EXPERTS

- * Gas * HVAC * Water
- * Electricity
- Volts
- Amps
- KiloWatts
- Power Factor
- Peak Demand
- Harmonic Distortion

LOBBY DASHBOARDS

TORONTO PEARSON INTERNATIONAL AIRPORT | **YYZ** Mississauga, Ontario

Overview: International Airport with a variety of vendors located onsite
Problem: Requires meter upgrade for tenant billing and facility management using existing network
Solution: i-Meter 636 and M3 series meters
Benefits: Installed water, gas and electrical metering with a solution that provides the flexibility for evolving or changing tenants without the need to change the current meters. Integrated the new metering system and RF technology with the existing computer network allowing for communication from multiple different buildings and the radar tower.
Property Management: Greater Toronto Airport Authority

VANCOUVER INTERNATIONAL AIRPORT | **YVR** Richmond, British Columbia

Overview: Intellimeter has provided Vancouver International Airport with a variety of services/products throughout the airport for 3 generations
Problem: Airport requires tenant billing, facility management, water, gas and electric metering
Solution: Upgraded IMA meter to M3 Series metering solution
Benefits: Provided the flexibility to address evolving and/or changing tenant metering requirements without the needing additional meters. Integrated the new solution with the existing computer network to facilitate communication between buildings and remote facilities throughout the airport. The airport is able to meter the hotel located onsite as well.
Property Management: Vancouver Airports Authority

HARTSFIELD-JACKSON ATLANTA INTERNATIONAL AIRPORT | **ATL** Atlanta, Georgia

Overview: Concourse C - Concessions at ATL
Problem: Requires meter upgrade for tenant billing and facility management. Use existing network and include embedded metering.
Solution: i-meter@636 with MODBUS
Benefits: Integrated the new metering system with Modbus communications to tie into existing computer network allowing for communication from multiple metering points and ability to monitor usage for multiple vendors in Concourse C.
Partner: Siemens USA
Property Management: Greater Atlanta Airport Authority
