UNIVERSITY OF CALIFORNIA BERKELEY – BERKELEY, CA

Overview: Forensics center and data center at Berkeley lab
Problem: monitor individual loads for different sections of the forensics center; Lab: monitoring of power consumption for cooling
Solution: i-meter® System designed to monitor consumption and independent system designed to monitor power consumption for cooling of lab
Benefits: Created two separate solutions
Partner: Siemens USA

DREXEL UNIVERSITY - PHILADELPHIA, PA

Overview: Drexel student housing at Philadelphia campus
Problem: Tenant billing for 250 student housing units in 3 tower building, accurately bill for actual consumption
Solution: i-meter®636 with billing software integration with MODBUS, factory embedded into distribution panels, easy installation
Benefits: Installation cost savings, accurate billing
Partner: Siemens USA

UNIVERSITY OF TORONTO MINING EDUCATION – TORONTO, ONTARIO

Overview: Mining Educational Building for University of Toronto.
Problem: Conservation tool needed to educated students on energy conservation, alternative energy generation (solar panels), energy management.
Solution: i-meter™ 636 with Mango software integration with MODBUS TRU protocol
Benefits: Educational tool, used as a competition for graduate students to conserve energy. It created an educational program that is designed to teach energy management and alternative energy generation (solar) to graduate students. The solar panel monitoring system illustrated the input power to feed common area loads and the decrease on normal power usage

INTELLIMETER CANADA INC. develops a comprehensive line of energy meter solutions and distributes to a range of private and public sector clients. We enable customers with accurate energy information that strengthen conservation and energy accountability and help to promote lean property management.

APPLICATIONS:

- Monitor for Energy Conservation Initiatives
- Load Management, Balancing & Protection
- Energy Cost Allocation / Tenant Billing
- Remote Branch Location Circuit Monitoring
